Lloyd Alter – Tiny House Meets Digital Fabrication In The FOUNDhouse

June 2014. First there was the *Wikihouse*, "an Open Community Construction Set. Its aim is to make it possible for almost anyone, regardless of their formal skills, to freely download and build structures which are affordable and suited to their needs."

Then there is *DesignBuildBLUFF*, the wonderful student design/build project from the University of Colorado where "Calloused hands, engaged minds, and open hearts align with resourcefulness and ingenuity to create a home for some of the last people to expect it."
