

The Ecotopia 2121 Project

The Ecotopia 2121 Project sets out to represent 100 cities throughout the world as they would appear in the year 2121 — if they've managed to survive and become super eco-friendly.

Over three years of research, fieldwork, seminars, travel, discussion, theorizing, writing, and drawing — a compendium of 100 illustrated stories was assembled together about how 100 cities from around the world can transform into Green Utopias by the year 2121AD. The 100 selected cities include famous places like London, New York and Paris but also some faraway places you've probably never heard of. Also included are mysterious cities like El Dorado, Timbuktoo, Xanadu and Shangri La — which may sound like fantasy and fiction but, actually, they're all real cities.
