

Dr. Zuleyka Zevallos - Building Sustainable Cities For The Future

sociologyatwork.org. July 25, 2013. In just a few hours, the UN is hosting an online panel to discuss its recent report, *World Economic and Social Survey 2013: Sustainable Development Challenges*. The panel will discuss issues arising from its research on building sustainable cities, food security and energy transformation. Below I provide an overview of the major findings and some sociological resources that speak to the theme of green planning.
