

Watch This Film About How Simple Solar Lamps Can Transform The Developing World

Photo: phys.org

fastcoexist.com. September 2014. If you were to pick a social invention with greatest bang-for-buck value, you might plump for a solar lamp. These cheap simple devices are life-changing because they're relatively cheap, simple to use, and have so many knock-on benefits for communities that have traditionally used kerosene lamps and candles.

This nicely made film comes via Great Lakes Energy, a solar supplier in East Africa, and the Global Brightlight Foundation, U.S. nonprofit that developed a lightweight lamp powered with a portable solar panel. It focuses on the Kiziba Refugee Camp in Rwanda and shows how 3,700 households there have benefited from the technology.
